

Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau

1.2 – Purpose of the Project

The overall objective of this project is to analyze the electricity consumption data by using Tableau. It will assist in visualizing the electricity consumption patterns and trends during different years, regions, states, and time periods.

Objectives of the Project

To study the consumption pattern of electricity by analyzing past data.

To visualize the consumption patterns of electricity using Tableau dashboards.

To study the consumption trend between different states and regions.

To analyze the consumption, pattern every year, quarter, and month.

To assess how different events, like the lockdown due to the COVID-19 pandemic, affect the consumption of electricity.

To find out the states or regions which have highest or lowest electricity consumption.

To obtain meaningful insights from the data.

To improve data analysis and visualization skills by using Tableau software.

Overall, Purpose

This project is intended to provide meaningful visualization of the electricity consumption data. It will help in understanding electricity consumption beha
