

Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau

TEAM ID	SWTID-2026-2268
PROJECT TITLE	Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau
MAX MARKS	3 MARKS

3.3 – Data Flow Diagram

Step-by-Step Electricity Consumption Data Flow

Step 1: Collecting Electricity Consumption Data

We need to get electricity consumption data from Excel or CSV files.

Step 2: Connecting Electricity Consumption Data to Tableau

The electricity consumption data needs to be connected to Tableau.

Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau

Step 3: Preparing Electricity Consumption Data

The electricity consumption data has to be cleaned and organized.

Step 4: Processing Electricity Consumption Data

We have to analyse and categorize the electricity consumption data.

Step 5: Visualizing Electricity Consumption Data

We create charts and graphs using the electricity consumption data.

Step 6: Creating Interactive Dashboards and Stories with Electricity Consumption Data

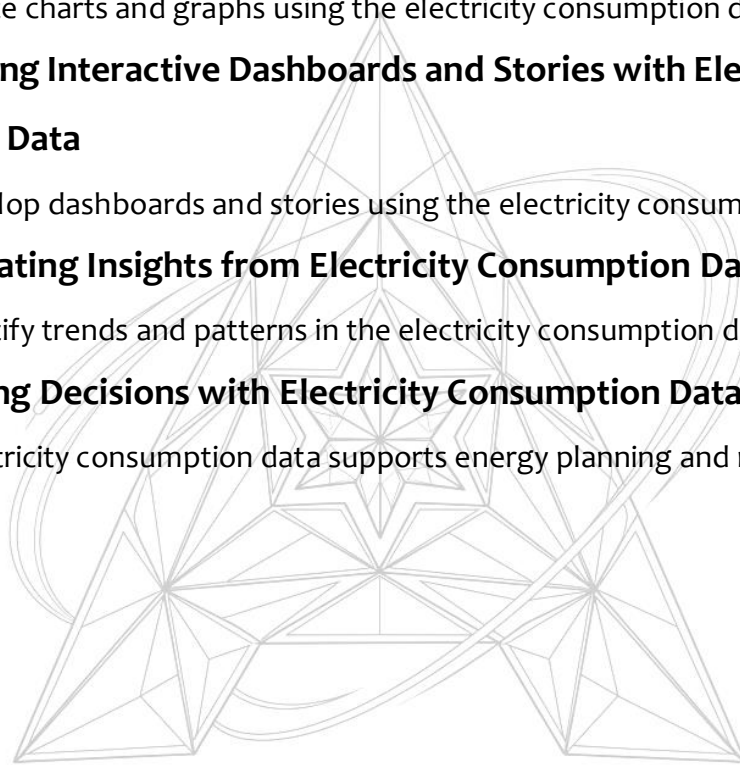

We develop dashboards and stories using the electricity consumption data.

Step 7: Generating Insights from Electricity Consumption Data

We identify trends and patterns in the electricity consumption data.

Step 8: Making Decisions with Electricity Consumption Data

The electricity consumption data supports energy planning and management.
