

Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau

TEAM ID	SWTID-2026-2268
PROJECT TITLE	Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau
MAX MARKS	3 MARKS

3.4 – Technology Stack

Hardware Requirements

- **Processor:** Intel Core i7 Processor
- **RAM:** 16 GB
- **Storage:** 256 GB SSD

Software Requirements

- **Tableau Desktop** – Used for creating interactive dashboards and visualizations.
- **XAMPP** – Provides the MySQL server environment for database management.
- **MySQL Workbench** – Used for importing, storing, and managing electricity consumption data.
- **Python** – Used for data preprocessing and analysis tasks.
- **PyCharm** – Integrated Development Environment (IDE) for Python programming.
- **Git** – Used for version control and project management.

Technology Stack

Component	Technology Used
Data Visualization	Tableau Desktop
Database Server	XAMPP (MySQL)
Database Management	MySQL Workbench
Programming Language	Python
Development Environment	PyCharm
Version Control	Git

Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau

Conclusion

The project utilizes Tableau for visualization, MySQL for data storage and management, Python for data processing, and Git for version control. Together, these technologies provide an efficient platform for analyzing and exploring electricity consumption patterns.
