1. Smart Bridge Live Sessions: Successfully attended all 18 days of Smart Bridge live sessions to gain knowledge about Tableau.

2. Data Collection: Collected the electricity consumption dataset from reliable sources and organized the data in a suitable format for analysis.

3. Data Connectivity: Connected the collected dataset to Tableau and verified that the data was imported correctly for further processing.

4. Data Preparation: Cleaned and transformed the dataset by handling missing values, removing duplicates, and creating calculated fields to improve data quality.

Plugging into the Future: An Exploration of Electricity Consumption Patterns using Tableau

5. Dashboard & Story Creation: Developed interactive charts, dashboards, and stories in Tableau to visualize electricity consumption patterns and trends effectively.

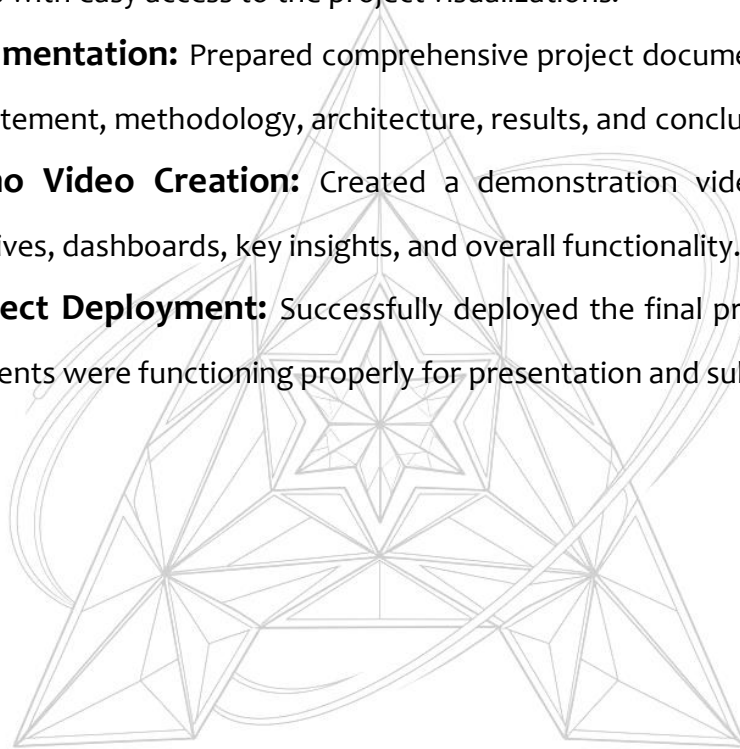

6. Tableau Public Upload: Published the completed dashboards and stories to Tableau Public, enabling online access and sharing of the visualizations.

7. Web Integration: Integrated the Tableau Public dashboard into a web page to provide users with easy access to the project visualizations.

8. Documentation: Prepared comprehensive project documentation, including the problem statement, methodology, architecture, results, and conclusions.

9. Demo Video Creation: Created a demonstration video explaining the project's objectives, dashboards, key insights, and overall functionality.

10. Project Deployment: Successfully deployed the final project and ensured that all components were functioning properly for presentation and submission.
